See facts on Jabra.com/commercial-claims How do I pair my Jabra Elite 65t or Jabra Elite Active 65t with my smartphone? 1. Start by ensuring the right earbud is turned off and not in the charging case. To manually turn off the earbud, press and hold the Multi-function button until the LED flashes red. 2. Next, press and hold the Multi-function button on the right earbud (5 seconds) until you hear the connection instructions in the earbud, and the LED flashes blue. Release the button, and follow the voice-guided instructions to pair with your smartphone. 3. You may need to press and hold the Volume down button on the left earbud (1 second) to turn it on. Note: If pairing with a smartphone for the first time, the Jabra Elite 65t/Jabra Elite Active 65t automatically goes into pairing mode after being turned on. Follow these steps to complete first-time pairing. 1. Simultaneously press and hold (3 seconds) the Multi-function button on the right earbud and the Volume down button on the left earbud to turn on the earbuds. 2. Follow the voice instructions to pair with your smartphone. JABRA ELITE 65T Review – Jabra Elite 65T uses the IEM (In-Ear Monitor) design, this earphone is truly true wireless, making it similar to AirPods. The difference is that the Jabra Elite 65t uses an IEM design that can be more firmly attached to the ear while the AirPods use the earphone handle as a counterweight. The design is so ergonomic and follows the shape of the ears, this is also what makes us interested in having these earbuds. Uniquely, although the material consists of a lot of plastic, the appearance of in-ear earbuds looks so premium with a blend of monochrome, black and gray colors. Jabra Elite 65T has a fairly complete feature and saving battery. The first is the left side of the IEM which has a mini button for sound settings as well as the Next / Previous music you are playing. While on the right side, one main button is used for Play / Pause (press once), call Siri (iOS) (press and hold) and HearThrough technology (press twice). Source : techradar.com Jabra Elite 65T is an earphone that has very complete connectivity. The disadvantage of most Bluetooth earphones is that connectivity is not stable and disconnected, but with these Jabra earbuds you can comfortably listen to music smoothly Why is Elite 65T connectivity so good? Because it's already equipped with Bluetooth 5.0 technology. Keep in mind, Apple's class with AirPods still uses Bluetooth 4.2 technology with additional features from Apple to strengthen bluetooth connections. The greatness of Bluetooth 5.0 is stability and connectivity speed despite the distance between the two connected units. For example, if Bluetooth 4.2 belongs to AirPods can pair up as far as 10 meters, then Bluetooth 5.0 can be paired at least two times up to four times as much. In addition, the Elite 65t can also be connected to two devices at a time. So you can pair on your laptop and smartphone without having to delete the pairing status first. Jabra Elite 65T can listen to music, Jabra Elite 65T can also make phone calls with a single click. Innovative, Jabra immerses technology that allows the Elite 65T to connect with voice assistants such as the Google Assistant, Siri, or Alexa You can safely use these earbuds when driving, because of the Hearthrough feature. This feature, allows you to still be able to hear the ambience around you. So even though it feels tight because there are earbuds, by activating this feature, your ears can still hear the sounds around and make you still safe while driving. In addition, it should be noted that the Elite 65t already has an IP55 certificate that makes these earbuds anti-dust and dustproof. Water repellent here is actually intended to splash water or sweat when used in sports. JABRA ELITE 65T Jabra Elite has an application called Sound + which can be downloaded on the Play Store or App Store. In this application, there are various options such as activating Hearthrough, equalizer settings and others. This is the most fundamental part of the quality of earphones, regardless of the model. And congratulations to Jabra, for designing bluetooth earbuds with top quality that are highly recommended for purchase. The most thumbs up when listening to music using this earphone is not the vocal sound behind the instrument. Jabra Elite 65T truly produces detailed sound, both on vocals (Mid, Treble (high), to bass (low). But Jabra earphones really prioritize bass, the bass sound produced is deep, but not too deep bass sound. But this is a matter of taste, because when the bass boom is not deep, it means you can say the bass sound does not disturb the details of other sounds and Jabra Elite 65T also have noise-cancelling. Because Jabra Elite 65T uses bluetooth 5.0, because of this technology, the power efficiency is more optimal by consuming less battery power. For the earbuds themselves, it can last five hours. When added with a charging case in full power, the total duration of use can be 15 hours.
